🧠 Skills

Python | C++ | HTML | CSS | JAVA Basics

JavaScript | Data Structures & Algorithms

MYSQL | PHP

📂 Projects

Boatel - An Hotel Booking Website ⬈
Created a website using which a user can search hotels using pincodes and can book a hotel room for a specific date and time.
Technologies Used-: *HTML, CSS, JAVASCRIPT, PHP, MYSQL.*

Automated Email (Web Scrapping) ⬈
The product price that the user want to buy is scrapped from Amazon website. When the product price gets below the mark set by the user, then automatically an email will be send to user reminding him to buy the product.
Technologies Used-: *Python, Beautiful Soup (Python Library), SMTP Library (For sending emails).*

Ahen - A driving class booking website ⬈
Created a website using which users can book a driving class online. In this project I have used JavaScript localstorage for storing the data.
Technologies Used:- *HTML, CSS, JAVASCRIPT.*

BookIT - A second hand book selling website. ⬈
Created a platform for students to sell their old books and also to buy old books.
Technologies Used-: *HTML, CSS, JAVASCRIPT.*

🔖 Certifications
